NEGATIVE PRESSURE EXHAUST FANS

Scanned with CamScanner

EXHO FAN

- Introducing the range of EXHO FANS, exhaust fans known for powerful and fast heat dissipation.
- The fans are designed for negative pressure, high performance and industrial use for long life and robust construction.
- The motor used is 100% full copper wire wound.
- The fan blades are ergonomically designed to maintain negative pressure in the room.
- They are made from high quality aluminium alloy of 1.6mm to 2.0mm thickness.
- They have the characteristics of high toughness, low noise and high volume air discharge.
- The protective net is made from reinforced and encrypted iron net, which has the effect of preventing the odour entry and for safety & protection.
- The negative pressure fans have passed multiple inspection of authority and accords with the European CE certification standard.

Technical Specifications

Model	Power (kw)	Air Volume (m3/h)	Voltage (v)	Speed (r/min)	Fan Leaf diameter (mm)	Shape size (mm) Long x high x thickness
EXF -1380	1.1	45000	380/220	450	1270	1380 x 1380 x 350
