

Low Solid Flooring System

L

Season's Greetings from Udadhi Infrastructure,

Today's Topic - Low Solid Flooring System

Udadhi Infrastructure, as all of you know is involved in serving its esteemed customers with plethora of products and services in a vivid spectrum through four divisions under its tree. The entire umbrella works with great compassion in providing the customers with products with excellent quality and a service which will be remembered for years. Our team might seem small but our dreams are big. Udadhi infrastructure works under four divisions viz.

1. Advanced Coatings
2. Vayave (Air Handling systems)
3. BOP (Balance Of Plant)
4. SWD (Software Development)

Today we would love to introduce you all to a unique product that we provide under the Coatings Division. The product is called as "LS-500" which is the most economic flooring system. The system consists of a low solid epoxy and poly-urathene combination. It is frequently used where only pedestrian movement is prominent and is void of any heavy machine movement.

The system Specifications are as follows -

a. Water based Epoxy Primer - 1 Coat

b. Water based PU top - 2 coats

Usage of the system -

1. General Purpose Application
2. Areas with low traffic density
3. Water Proofing
4. Heat resistance

Applications of the system-

- a. Water Tanks and Civil Bodies
- b. Rooftops/External cladding
- c. Factory floors, Pharmacy industries, Food Industries
- d. Shops, Hotels and haberdashery

Products -

1. MYK Epoxy
2. MYK Poly Urathene

We are also attaching the catalogues of the products mentioned above so that you all will get a better understanding by a visual aid.
